

# Star Projects Integration

For Organisations that have a heavy project focus, Greentree's integration to Star Projects provides the perfect solution.

Star Projects provides service and project based organisations with a powerful tool to automate and monitor project management, time & expense recording and approvals, budget

control and resource planning. Star Projects covers similar territory to Greentree's Job Costing module however, Star Projects offers users significantly enhanced functionality in every area.

## Integration Points

### General Ledger

Creation of transaction analysis codes for Clients/Projects/Phases.

### Accounts Payable

Accounts Payable vouchers generate cost transactions in Star Projects.

### Expense Reimbursements

Expense claims generate accounts payable vouchers for employees' reimbursements.

### Accounts Receivable

Accounts Receivable integration provides flexible invoicing options for projects in Accounts Receivable and/or Star Projects.

### Job Costing

As an alternative option, Star TimeRecorder also integrates directly to the Greentree Job Costing module.
